

First Year Degree Guide

A practical starting point for QUT students exploring pathways into artificial intelligence, data, and machine learning.

What is inside

- The QUT pathways currently listed by AIML
- Simple ways to start getting involved
- A reminder to confirm official course details with QUT

Degrees connected to the field.

01 Bachelors

- Bachelor of Information Technology (Artificial Intelligence)
- Bachelor of Data Science (Artificial Intelligence and Machine Learning)
- Coming soon: Bachelor of Engineering (Machine Learning Systems)

02 Masters

- Master of Artificial Intelligence
- Master of Robotics and Artificial Intelligence

A helpful starting point

These pathways reflect the current AIML About page. Course titles and availability can change, so use QUT official sources before making an enrolment decision.

Other ways into the field.

03 Other relevant courses

- Bachelor of Information Technology (Computer Science)
- Bachelor of Information Technology (Software Development)
- Bachelor of Data Science (Data and Decision Analytics)
- Bachelor of Engineering (Computer and Software Systems)
- Bachelor of Engineering (Mechatronics)
- Master of Information Technology (All majors)
- Master of Data Science (All majors)

GET STARTED

Start with the next small step.

01 Find your people

Attend an AIML event and meet students exploring the same field.

02 Try the work

Browse the project archive and see how ideas become practical experiments.

03 Keep asking

Use this guide as a starting point, then confirm course details with QUT and speak with the right university advisers.

QUT AIML

Learn together. Build with purpose.
